COLLECTION OVERVIEW  
FALL/WINTER 2024/2025

EMBARK ON THE FALL/WINTER 2024/2025 ODYSSEY:  
UNVEILING EVOC'S NEW LINE OF WINTER PRODUCTS

Dear Adventurous Souls,

As winter wraps its icy embrace around the rugged peaks and snow-laden landscapes, we at EVOC welcome you to a season of boundless possibilities. With a heritage deeply rooted in the pursuit of adventure, our journey through time has been marked by passion, innovation, and an unwavering commitment to safeguarding your alpine pursuits. I guess you can read our excitement in every single word of this editorial.

Nestled within the heart of this special season there is the story of passion and dedication that defines our brand. From the inception of EVOC, we have embraced the challenge of crafting products that not only withstand the harshest elements but elevate your experience in the winter wonderland. Our commitment to protection is etched in the very fabric of our existence, and it resonates through the snowy peaks we call home. As we stand on the precipice of another winter season, we are thrilled to present our latest achievement – a lightweight, but yet functional solution for alpine touring adventures.

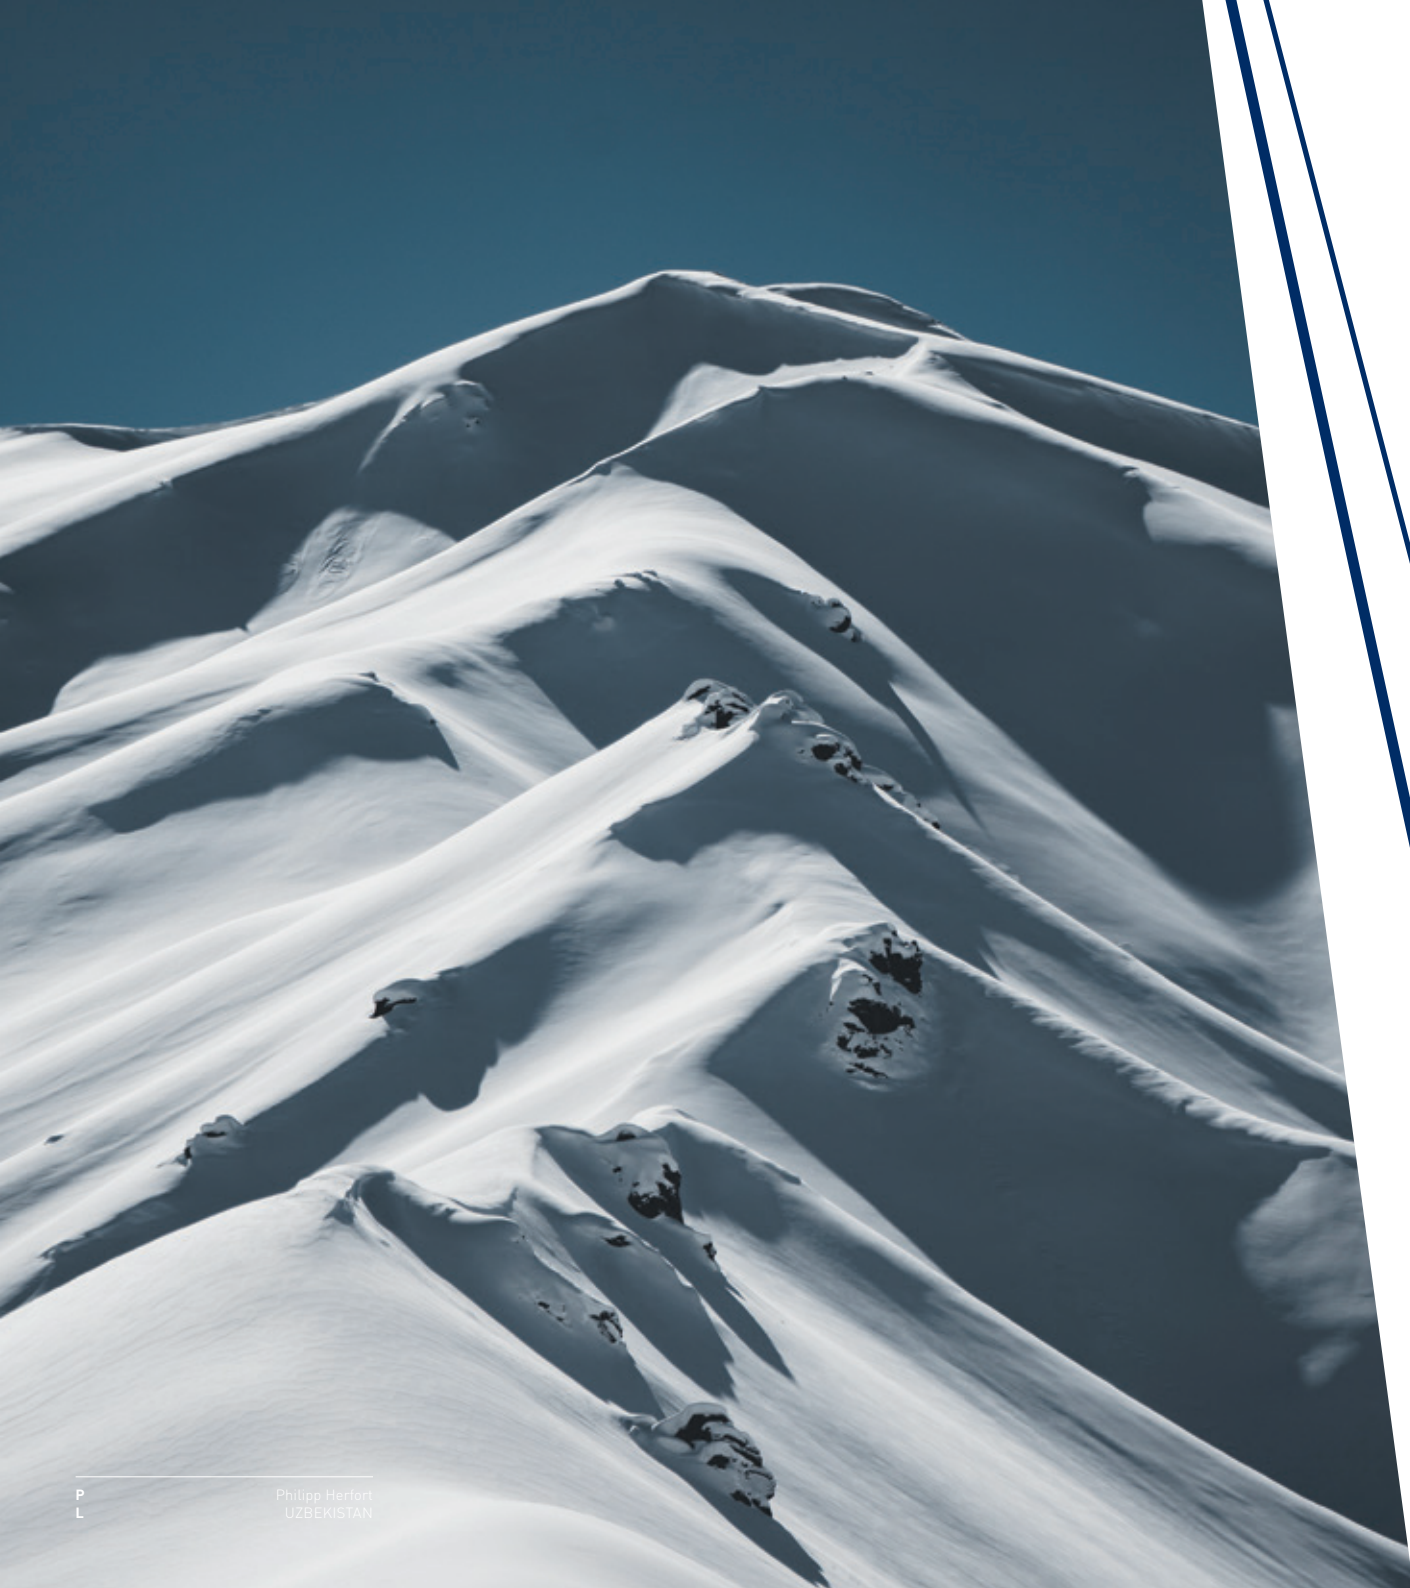

Crafted with the precision born from years of mountain experience, this backpack. Like all of our products, is more than a piece of gear; it is a reliable companion on your journey through the untamed beauty of snowy slopes.

We understand the demands of modern touring – the weight of the snow, the unpredictability of the weather, and the unforgiving nature of the terrain. In response, we have meticulously designed this backpack to be your steadfast ally, blending feather-light construction with features tailored to meet the demands of ski- or splitboard touring.

Embrace the call of the alpine and let the EVOC FW 24/25 collection be your beacon in the winter storm. May your adventures be as boundless as the snow-covered peaks that await.

SAFE TRAVELS,  
YOUR EVOC EDITORIAL TEAM OF WINTER EXCITEMENT

# SUMMIT 30

## FULLY EQUIPPED ADVENTURE PACK FOR OVERNIGHT SKI TOURING

Follow the call of the mountains! Made of 50% recycled polyester outer material, the Summit 30 is a lightweight, minimalist ski touring adventure backpack with a 30L capacity, as well as outstanding carrying comfort thanks to our ergonomic NEUTRALITE CARRY SYSTEM designed to ensure exceptional load distribution and efficient ventilation. Shovel and probe go into the AVALANCHE EQUIPMENT POCKET with integrated emergency plan, while the HELMET HOLDER enables you to fix your helmet safely to the outside of the pack. The CLIMBING SKIN / CRAMPON POCKET is perfect for neatly storing the skins after ascending, while the HYDRATION BLADDER COMPARTMENT can accommodate bladders of up to 3L capacity, for continuous water supply on tour.

SKI FIXATION (DIAGONAL / VERTICAL)

ICE AXE STRAP, can also be used to fix ski poles

HYDRATION BLADDER COMPARTMENT for bladders of up to 3L capacity

NUTRITION COMPARTMENTS for energy bars and gels

PFAS-free finish

NEUTRALITE CARRY SYSTEM for exceptional load distribution and highly ventilated carrying comfort

CLIMBING SKIN / CRAMPON POCKET WITH QUICK SIDE ACCESS

AVALANCHE EQUIPMENT POCKET WITH INTEGRATED EMERGENCY PLAN

MULTIFUNCTIONAL FIXATION LOOPS FOR ATTACHING ADDITIONAL EQUIPMENT

HELMET HOLDER

# SUMMIT 20

## LIGHTWEIGHT PERFORMER FOR AMBITIOUS DAY SKI TOURING

Ultralightweight and extremely high-performance, the Summit 20 is ready to conquer any mountain peak. This extremely minimalist ski touring daypack made of 50% recycled polyester outer material offers a 20L capacity, as well as outstanding carrying comfort thanks to our ergonomic NEUTRALITE CARRY SYSTEM designed to ensure exceptional load distribution and efficient ventilation. Shovel and probe go into the AVALANCHE EQUIPMENT POCKET with integrated emergency plan. The CLIMBING SKIN / CRAMPON POCKET is perfect for neatly storing the skins after ascending, while the HYDRATION BLADDER COMPARTMENT can accommodate bladders of up to 3L capacity, for continuous water supply on tour.

SKI FIXATION (DIAGONAL / VERTICAL)

ICE AXE STRAP, can also be used to fix ski poles

CLIMBING SKIN / CRAMPON POCKET WITH QUICK SIDE ACCESS

MULTIFUNCTIONAL FIXATION LOOPS FOR ATTACHING A SEPARATE HELMET HOLDER

AVALANCHE EQUIPMENT POCKET WITH INTEGRATED EMERGENCY PLAN

NUTRITION COMPARTMENTS for energy bars and gels

PFAS-free finish

NEUTRALITE CARRY SYSTEM for exceptional load distribution and highly ventilated carrying comfort

## VERSATILE INSULATED BOTTLE HOLDER FOR BACKPACKS AND BIKES

Clever design plus efficient insulation – the Multi Holster is a versatile bottle holder that is easy to attach to the shoulder strap of your backpack or to the handlebar / stem on your bike. Developed to hold an additional drinking bottle of up to 0.75l capacity, it ensures continuous hydration while on the go. And if there's no bottle in the Holster, you can use it to store small items like energy bars, gloves or your mobile phone. Insulated padding retains the temperature of your drink for as long as possible. Also includes a drawcord, small pockets and multifunctional attachment loops.

PFAS-free finish

Can be fixed to the shoulder strap or handlebar / stem

INSULATED PADDING WITH SILVER COATING TO KEEP DRINKS WARM OR COLD FOR LONGER

FASTENING OPTION FOR SUNGLASSES

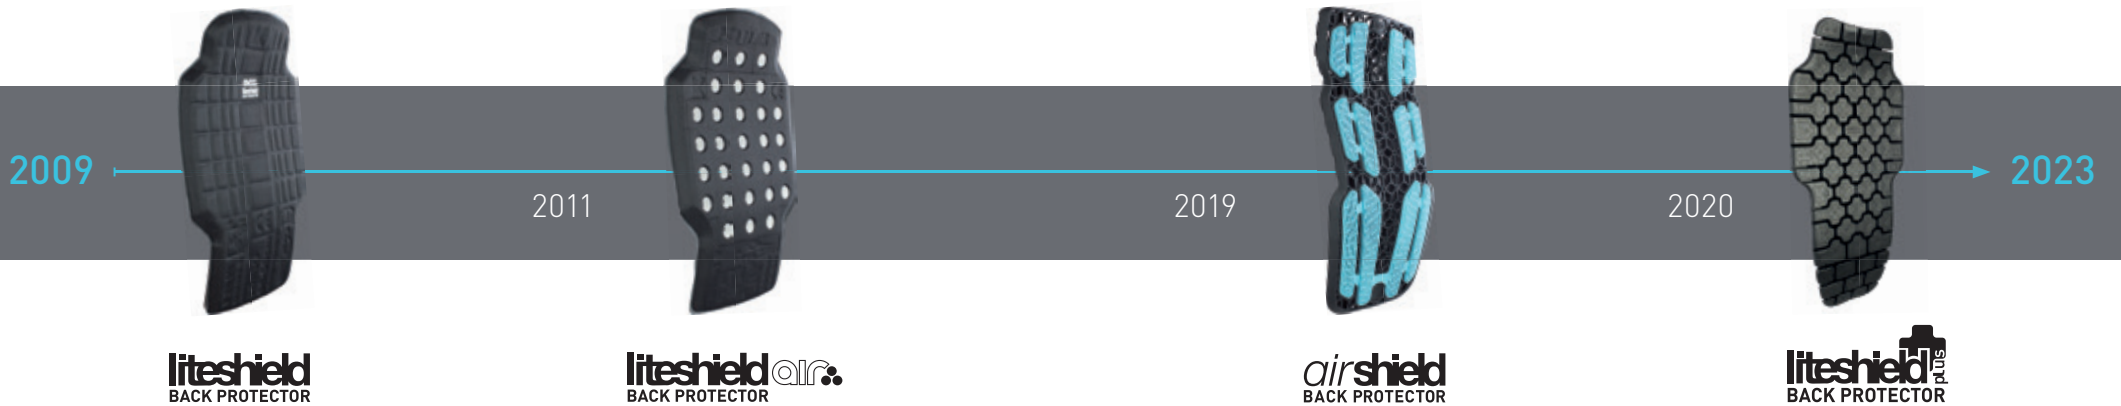

MULTIFUNCTIONAL ATTACHMENT LOOPS

# PROTECTION HISTORY

The EVOC story begins with a back injury while snowboarding. Freerider and product developer Holger Feist is injured by an avalanche shovel in his backpack. An integrated back protector would have prevented this, but protector backpacks didn't exist back then. So Holger starts developing them himself...

Today, EVOC is the market leader for mountainbike and winter-sports protector backpacks and with our latest technological development - LITESHIELD FLEX - we are continuing this success story. Not convinced by the technologies the market had to offer, we set to work ourselves. During a months-long development process, we have done research on innumerable material mixes and geometries, then developed and tested until we finally found the ideal solution. The result: protection and comfort on an entirely new level.

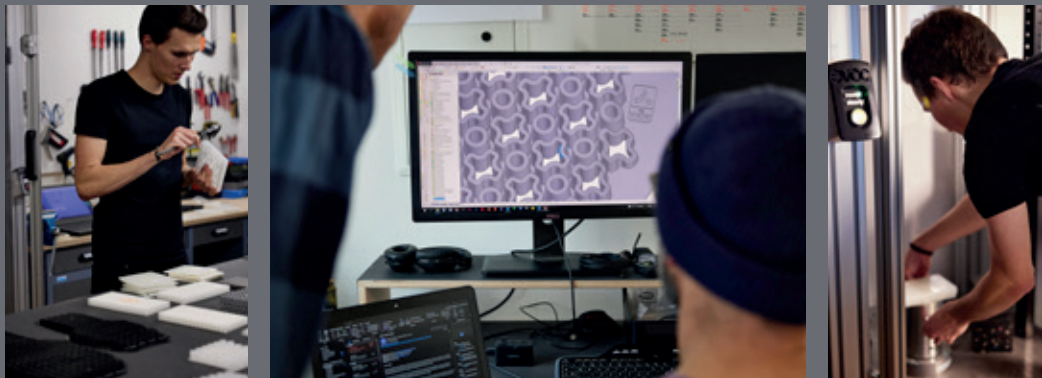

In 2009, the time has come and we launch our first protector backpacks with the landmark LITESHIELD back protector.

Large openings for more ventilation and a special coating ensure optimised temperature management.

A grid structure made of XELION Nanotec elastomer ensures outstanding flex and maximum ventilation.

The further development of our classic: minimum weight, maximum protection – now with a PLUS in flex and ventilation.

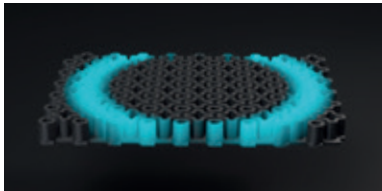

PLEASE  
WELCOME  
OUR NEXT  
MILESTONE

# LITESHIELD FLEX

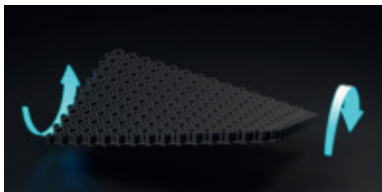

Protection and comfort that has no equal. LITESHIELD FLEX is EVOC's latest protector technology with an unprecedented level of comfort and freedom of movement.

### 95 % SHOCK ABSORPTION

Absorbs up to 95% of impact force and easily meets CE-Level 1 standards.

### ULTIMATE FLEXIBILITY

Superior ergo-dynamic flex, thanks to a specially developed TPE blend and geometry.

### 3D-VENTILATION

Designed for maximum breathability, ideal airflow, and low weight.

### TEMPERATURE INSENSITIVITY

Consistent impact protection and constant flexibility at all temperatures [-20 to 40 degrees Celsius].

## HIGHEST PROTECTION WITH MAXIMUM COMFORT

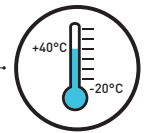

95 % SHOCK ABSORPTION

ULTIMATE FLEXIBILITY

3D-VENTILATION

TEMPERATURE INSENSITIVITY

- Outstanding wear comfort
- EN 1621-2, up to level 2 certified
- Fully recyclable

HIGHLIGHT //

# PROTECTION WEAR

After more than two years of development, we are happy to present our brand-new PROTECTION WEAR that sets completely new standards.

**NEVER BEFORE HAS PROTECTION FELT THIS COMFORTABLE WHILE BEING RESOURCE-EFFICIENT AND WITHOUT COMPROMISING PROTECTIVE FUNCTION.**

//PROTECTION

The centerpiece is our highly flexible LITESHIELD FLEX protector technology. It provides excellent impact absorption, is airy and lightweight, and adjusts perfectly with every move of your body at any temperature.

**liteshield** FLEX  
PROTECTOR TECHNOLOGY

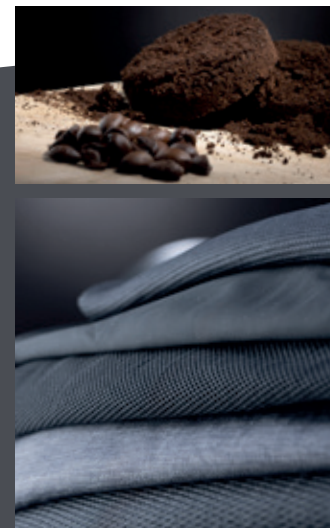

//PERFORMANCE

High-performance textiles and tailoring offer comfort and function on a level that you usually only find in base layers and sportswear. It is smooth to the touch, highly breathable, moisture-wicking, quick-drying, elastic, and odor-neutra-

lizing, and has a fit that's fine-tuned for freedom of movement and use during performance sports. The result: PROTECTION WEAR that has an incredibly comfortable, barely-there feel.

//SUSTAINABILITY

Thoroughly and genuinely sustainable: We not only use materials with a high recycling content, but also take into consideration the energy and resource footprints of our fabrics and use innovative technologies such as S.Café® technology to manufacture the most sustainable and modern textiles. Moreover, we went to great lengths to make our PROTECTION WEAR as recyclable as possible.

# PROTECTION WEAR

## SETTING NEW STANDARDS IN COMFORT AND MOBILITY

Created with a rigorous attention to detail and a focus on sustainability.

\*REVOLTEX® RECYCLING TECHNOLOGY at: Protector Vest Lite Women, Protector Vest Lite Men, Protector Vest Women, Protector Vest Men, Protector Vest Kids, Enduro Shirt

**LITESHIELD FLEX PROTECTOR TECHNOLOGY**

EVOC's latest protector technology with up to 95% impact absorption offers excellent protection in falls and is so flexible that the protector gives you a snug, second-skin feel combined with next-level freedom of movement. All of this is made possible by the combination of a highly flexible thermoplastic elastomer (TPE) blend created specifically by EVOC and a sophisticated geometry, also specially developed by EVOC and adapted perfectly for this blend.

The geometry, made up of plus shapes and circles, provides not only the basis for the protector's superior, ergo-dynamic flex, but also makes for a homogeneous pattern, which is key for achieving extensive protection on various surfaces. The patterned construction also reduces the overall weight and enables extensive 3D-ventilation making the protector even more comfortable.

What is absolutely unique, is the temperature insensitivity of the TPE blend. It offers consistent impact protection and constant flexibility at a temperature range between -20 and 40 degrees Celsius. This makes the LITESHIELD FLEX protector technology suitable for summer and winter sports alike.

Besides the consistently high level of protection and next-level comfort, the new LITESHIELD FLEX technology has yet another important benefit: Compared to the two-component foams often used in protectors, the TPE material of our LITESHIELD FLEX protector can be recycled, because it can be melted down and reused.

95 % SHOCK ABSORPTION

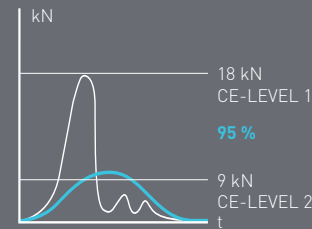

ULTIMATE FLEXIBILITY

3D-VENTILATION

INSENSITIVITY

LITESHIELD PLUS BACK PROTECTOR

CE-NORM EN 1621-2

Materials and protective functions have been tested and certified by the independent test laboratory Ricotest, according to EU regulation 2016/425 for personal protective equipment (PPE), category 2.

EN 1621-2 REQUIREMENTS

With a residual-force value of under 11 kN, the LITESHIELD FLEX back protector achieves a damping effect that easily meets the requirements of CE Level 1. This means that up to 95 % of the impact force is absorbed!

Through the combination with other damping materials, we achieve values in the Level 2 range for some products (e.g. our PROTECTION WEAR PRO series).

# QUALITY MADE//

## ENGINEERED IN GERMANY

All EVOC products are engineered in Germany to ensure the highest standards of performance, durability and quality.

## PRODUCTION FACILITIES

Our products are made exclusively by handpicked manufacturers with a long-term reputation for delivering quality consistently. We ensure the quality of our products through regular on site visits and stringent quality control.

## MATERIALS

All the materials we employ are precisely adapted to the specific requirements of each individual product and its range of use. Functionality, protection and durability are parameters that play a decisive role in our selection.

We work with the best suppliers worldwide and only purchase the highest-quality materials. If materials or components do not meet our expectations, we develop them ourselves.

## EXPERIENCE AND FEEDBACK

Our staff of former professional athletes and ambitious riders with strong roots in biking and snow sports, has long-standing experience in manufacturing sports equipment and constantly use our equipment around the world. Every season our products

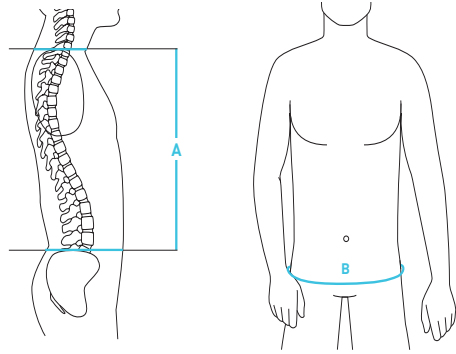

are also tested by world-class athletes who take our products to the limit.

The constant testing and resulting feedback ensure that every feature of an EVOC product has been refined to perfection by the time you hold it in your hands.

## SIZE GUIDE // PROTECTOR BACKPACKS & BACKPACKS

TORSO LENGTH **A** is critical for ensuring optimal protection and fit. To determine it, use a measuring tape and measure from the top of your hip bone to the tip of your shoulder. To determine your HIP BELT LENGTH **B**, measure your hip circumference.

### FR SERIES // LINE R.A.S. PROTECTOR (M/L)

SIZE	<b>A</b> // TORSO LENGTH	<b>B</b> // HIP BELT LENGTH
<b>S</b>	38 - 42 cm	76 - 105 cm [flex]
<b>M/L</b>	44 - 48 cm	84 - 115 cm [flex]
<b>XL</b>	49 - 53 cm	88 - 117 cm [flex]

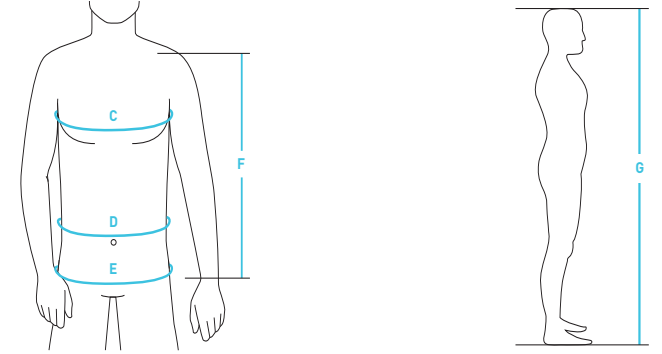

### TRAIL PRO, TRAIL PRO SF (XS) & NEO // LINE PRO

SIZE	<b>A</b> // TORSO LENGTH	<b>B</b> // HIP BELT LENGTH
<b>XS</b>	33 - 37 cm	70 - 100 cm [flex]
<b>S/M</b>	43 - 47 cm	76 - 118 cm [flex]
<b>L/XL</b>	48 - 52 cm	84 - 122 cm [flex]

### EXPLORER PRO 26, EXPLORER PRO 30

SIZE	<b>A</b> // TORSO LENGTH	<b>B</b> // HIP BELT LENGTH
<b>26 (S)</b>	36 - 42 cm	75 - 125 cm [flex]
<b>30 (M/L)</b>	43 - 52 cm	75 - 125 cm [flex]

## SIZE GUIDE // PROTECTION WEAR & TEAM WEAR

To determine your CHEST CIRCUMFERENCE **C**, use a measuring tape and measure from under your armpits around your chest. To determine your WAIST **D**, measure around your waist where you have your belly button. To determine your HIP CIRCUMFERENCE **E**, measure around your hip. For your ARM LENGTH **F**, measure from your shoulder tip to your wrist with the arm slightly bent.

To determine your BODY HEIGHT **G**, measure your full length from the floor up without shoes.

### MEN

SIZE	<b>C</b> // CHEST CIRCUMFERENCE	<b>D</b> // WAIST CIRCUMFERENCE	<b>E</b> // HIP CIRCUMFERENCE	<b>F</b> // ARM LENGTH	<b>G</b> // BODY HEIGHT
<b>S 44/46</b>	87 - 94,5 cm	76 - 82 cm	92 - 97 cm	60 - 62,5 cm	168 - 172 cm
<b>M 48/50</b>	94,5 - 102 cm	82 - 89 cm	97 - 105 cm	62,5 - 64,5 cm	172 - 178 cm
<b>L 52/54</b>	102 - 109 cm	89 - 98 cm	105 - 111 cm	64,5 - 67 cm	178 - 183 cm
<b>XL 56/58</b>	109 - 118 cm	98 - 110 cm	111 - 120 cm	67 - 69 cm	183 - 198 cm

### WOMEN

SIZE	<b>C</b> // CHEST CIRCUMFERENCE	<b>D</b> // WAIST CIRCUMFERENCE	<b>E</b> // HIP CIRCUMFERENCE	<b>F</b> // ARM LENGTH	<b>G</b> // BODY HEIGHT
<b>S 34/36</b>	84 - 88 cm	62 - 71 cm	85 - 96 cm	59 cm	165 - 168 cm
<b>M 38/40</b>	87 - 95 cm	71 - 78 cm	96 - 102 cm	60 cm	168 - 170 cm
<b>L 42/44</b>	95 - 102 cm	78 - 86 cm	102 - 109 cm	61 cm	> 170 cm

### KIDS

SIZE	<b>C</b> // CHEST CIRCUMFERENCE	<b>D</b> // WAIST CIRCUMFERENCE	<b>E</b> // HIP CIRCUMFERENCE	<b>G</b> // BODY HEIGHT
<b>JS</b>	62 - 67 cm	60 - 67 cm	65 - 71 cm	122 - 130 cm
<b>JM</b>	66 - 74 cm	64 - 74 cm	70 - 79 cm	130 - 143 cm
<b>JL</b>	74 - 85 cm	66 - 77 cm	79 - 90 cm	143 - 164 cm

# MATERIALS//

## We carefully select materials for our products or tailor them to our exact specifications.

We make sure that all of our products are lightweight and made of the best possible materials to ensure the utmost functionality and quality.

### OUTER MATERIALS

The best backpacks and bags are durable, abrasion-resistant, lightweight, and waterproof (or water-resistant). We use various types of fabrics with different weaves and thicknesses that optimally support the specific function of each product.

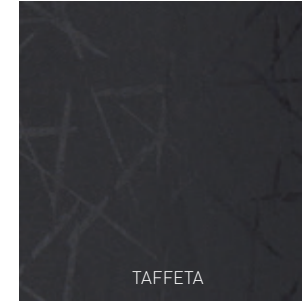

NP 3324 FD

Extremely abrasion resistant yet super lightweight, this high-quality nylon-polyester mix with PU coating on the inside endures even the harshest abuse yet feels soft to the touch and has a slick matte look.

N 100D SHADOW BOX

Our lightest fabric for all backpacks that need to be lightweight. The extremely tear-resistant relief-like structure is a result of how it is woven. The PU coating makes it water-resistant.

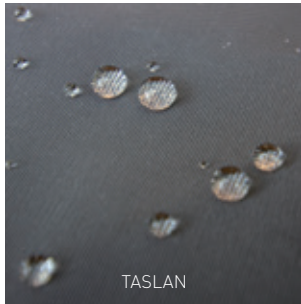

TAFFETA

We use this light, durable and completely waterproof fabric for our rain covers, in particular.

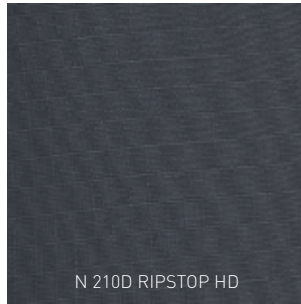

P 600D

Where usage involves high wear and tear, such as with bag bases or BIKE BAGS, we use this tear-resistant and lightweight polyester fabric. Water-repellent finish and even dirt simply rolls off the fabric.

TASLAN

Our high-end fabric, that sports an excellent low weight/stability ratio. Thanks to its special weave using thick and thin yarn, it is particularly tear-resistant and retains its shape, while the PU coating makes it completely waterproof.

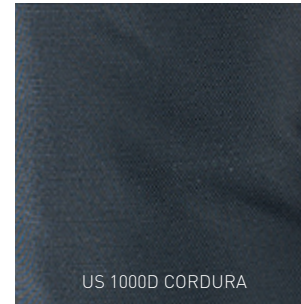

N 210D RIPSTOP HD

This high-density nylon fabric with ripstop construction is extremely lightweight, abrasion-resistant, and incredibly tear-resistant. The crosshatch weave pattern ensures that potential tears do not spread. Water-repellent coating.

N 420D HD

This nylon is ideal for use whenever a high degree of durability and abrasion resistance is required. The robust, high-quality fabric is remarkably lightweight and finished with a water-resistant inner coating.

US 1000D CORDURA

This exceptionally strong cordura fabric is practically indestructible. What really sets this material apart is its durability and protection, but it also scores high points for its low weight. Water-repellent thanks to a special coating.

NY200D X NT600D

This extremely robust, abrasion-resistant, 100% waterproof outer material made from a nylon-polyester mix (71% nylon, 29% polyester) also comes with PU and TPU coating, which makes it the perfect choice for products which will see high wear and tear, such as our BIKE PACKING bags.

N6 420D R/S

The lightweight yet incredibly durable and abrasion-resistant Polyamid textile made of high-end Nylon 6 fibers can take the hardest abuse and is therefore used in our photo range. Thanks to the 5mm Ripstop webbing it is specifically tear-resistant. Water-repellent and PFAS-free.

# MATERIALS// ENVIROMENTAL FOOTPRINT

## REDUCING & RECYCLING

An important pillar in the process of reducing our environmental footprint is the use of alternative materials. In doing so, we research and work with the best and most innovative suppliers worldwide to find materials that meet our high quality standards while being more resource-efficient and environmentally friendly.

POLY 600D 2-TONE WR W/TPU

For our heavy-duty EVOG products, we use this TPU-coated fabric. It is relatively light, extremely temperature-resistant, and completely waterproof. That makes it perfect to withstand all the knocks and scrapes that come with travelling. And the best: It is 100 % free of PVCs and PFASs.

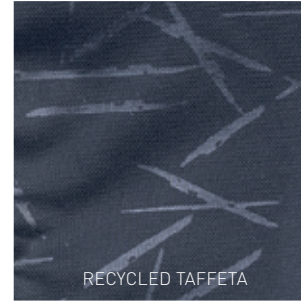

100 % RECYCLED  
P 300D X 600D

Our most resource-efficient and energy-conserving outer material: The Polyester is made entirely from recycled, pre-consumer waste and scores with its nice and silky touch while being utterly robust and durable. Finished with a high-quality PU-coating, making it dirt- and water-repellent.

LITESHIELD FLEX

A highly flexible thermoplastic elastomer (TPE) blend that we developed and adapted to the protector geometry. Compared to the two-component foams that are often used in protectors, our TPE has the advantages of being recyclable, using less energy during production, and creating minimal residual waste thanks to an injection molding process.

RECYCLED TAFFETA

Our recycled taffeta is waterproof, lightweight, and truly durable. Moreover, it's PFAS-free.

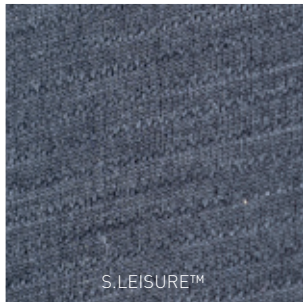

50% RECYCLED N 500 D

Very comfortable to the touch thanks to the special surface treatment (peaching), this material also displays a high degree of durability and abrasion resistance. 50% recycled Polyamid and water-resistant with a water column of 1,500 mm thanks to the PU coating and PFAS free finish.

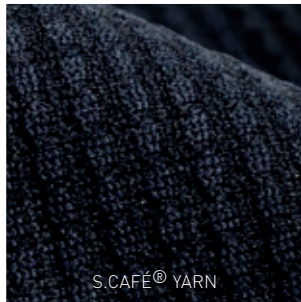

50 % RECYCLED N66 210D  
BABY R/S PD

Extremely robust, extremely lightweight – our N66 210D Baby R/S PD is an exceptionally tear- and abrasion-resistant, technical polyamide fabric made from 50 % recycled fibres. Featuring high-density yarn and separate segments, the integrated 2 mm Baby Ripstop prevents small rips from extending into large tears. Plus, the fabric has a comfortably smooth texture and glossy look. And PFAS-free impregnation ensures that it is water-repellent too.

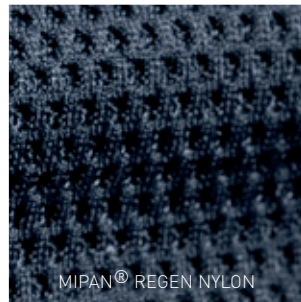

S.LEISURE™

A functional polyester fabric that is fast-drying, highly breathable, and flexible. Thanks to its water- and energy-saving production process, it has a significantly lower environmental footprint than similar textiles. Moreover, the bluesign® certified fabric is recyclable because its elasticity is achieved mechanically rather than through the use of elastane. Finished with the odour-neutralizing S.Café® technology that is also eco-friendly.

S.CAFÉ® YARN

An especially resource-efficient and highly functional yarn. In a patented, energy-saving process, coffee grounds are fused with recycled PET at low temperatures and high pressure. The yarn is transformed into a moisture-absorbing, fast-drying polyester fabric that provides excellent odour control. It can be recycled and is solution-dyed and bluesign®, OEKO-TEX®, Cradle to Cradle®, and GRS certified.

MIPAN® REGEN NYLON

MIPAN® regen is a GRS certified, regenerated nylon yarn that we use for the fast-drying, highly breathable, high-performance functional material of our PROTECTOR VEST PRO. It's made from 100% recycled production waste from chip manufacturing, thereby saving valuable resources.

## TREATMENTS & FINISHES

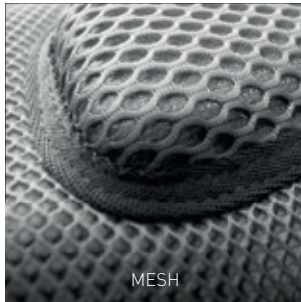

In addition to textiles made from S.Café® yarn, we use a finish with S.Café® technology on other fabrics to neutralize unpleasant odours. Coffee grounds have numerous microscopic pores that absorb odours in a chemical-free, long-lasting way. For this purpose, an extract is obtained from used coffee grounds from local cafés in a patented process that exploits precisely this natural, odour-absorbing ability and can then be used in textiles.

S.CAFÉ®  
ODOUR CONTROL

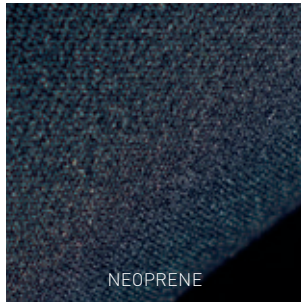

## FINISHING MATERIALS

MESH

During exercise, heat is generated, which should be wicked away from the body through appropriate ventilation. Depending on the scope of application, we use different, highly efficient mesh fabrics that ensure maximum air circulation, yet do not absorb moisture:

- AIR MESH
- 3D AIR MESH
- HONEYCOMB MESH

NEOPRENE

Neoprene exhibits flexibility and stability at the same time, and therefore offers exceptionally good grip – over a wide temperature range, and in wet and dry conditions. We use it for our lightweight SKI and BOARD COVERS.

AIRO FLEX

With its origin in medical device technology, this extremely sturdy premium material has everything to justify its use in our top-quality hip belts: exceptionally flexible, completely air-permeable, and yet sufficiently sturdy to keep the backpack in place with the load as close as possible to the body's centre of gravity.

## TREATMENTS & FINISHES

Our materials are finished with high-quality coatings that extend their lifespan and enhance the quality of our products. The coatings used on our lightweight outer materials provide protection from dirt and stains and prevent moisture from penetrating.

- PU COATING
- TEFLON COATING
- DURABLE WATER REPELLENCY

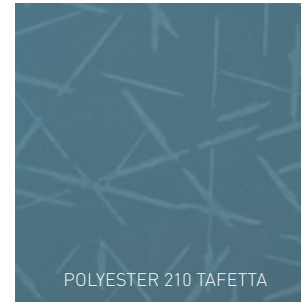

**POLYGIENE ODORCRUNCH™**  
Natural, silica-based odor absorbing technology that keeps fabrics smell fresh for longer and reduces the amount of washing required.

**POLYGIENE STAYFRESH™**  
Antibacterial, freshness technology that is embedded in textiles and inhibits the growth of odor-causing bacteria, so garments need less washing, saving water, energy and wear and tear.

## LININGS

By linings we mean our lining and inner materials that are used in our bags and backpacks. We vary these, too, according to the intended use for the bag or backpack, and ensure they are colour-coordinated so that the design experience can continue to be appreciated once they are opened up.

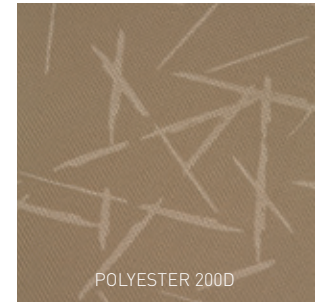

POLYESTER 210 TAFETTA

Our TRAVEL Line linings are soft and silky to touch and hold their shape well thanks to the fine web structure of the fabric. Ideal protection for clothing and personal equipment. The extra coating ensures it is robust enough for sports travel, too.

QUILT CUSH

A very soft, velvety and padded 3-layered material. It protects sensitive contents and is therefore used in the laptop compartment of our MISSION PRO.

POLYESTER 200D

Particularly robust and with an extra coating for enhanced resistance to wear and tear, our first choice for tool, hydration bladder and avalanche compartments and the like.

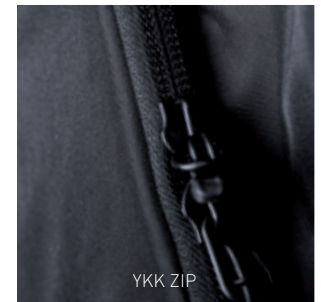

## FEATURES & ACCESSORIES

For our products, we only use premium accessories that support their function and add design value. If we cannot find the right accessories for our equipment, we simply develop them ourselves in order to optimally satisfy our expectations.

- YKK PLASTIC ADD-ON PARTS AND ZIPPERS
- WOJIN PLASTIC ADD-ON PARTS
- HYPALON ZIPPER GARAGES
- NON-STICK VELCRO
- EVA TARPULIN MESH (PVC-FREE)

WJ BUCKLE

YKK ZIP

## PROTECTOR MATERIALS

**liteshield XT**  
PROTECTOR TECHNOLOGY

Outstanding impact absorption and ultimate, ergo-dynamic flex - combined in a lightweight, optimally ventilated, and temperature-stable protector. Made of highly flexible thermoplastic elastomer (TPE) by injection moulding, it offers maximum freedom of movement and protection. CE-certified according to EN 1621-2, up to level 2.

**liteshield**  
BACK PROTECTOR

Originally used in motorcycling, this segmented EPS layer construction is characterised by maximum shock absorption values, extremely low weight and complete temperature insensitivity. TÜV/GS-certified.

**liteshield PLUS**  
BACK PROTECTOR

Innovative, extremely light, flexible and non-temperature-sensitive back protector. The 2-component sandwich construction made of highly-compressed EPP foam offers excellent impact protection and adapts to every movement with its plus-shaped segments. CE-certified to EN 1621-2, level 2.

# PROTECT THE THINGS YOU LOVE

## OUR MISSION

EVOC stands for evolution and the concept of high-quality, sports backpacks, bags, and luggage with a particular focus on proper protection of rider and gear.

For us, sport and travel mean adventure, unique experiences, and a good time with friends. Our products are always a little more than just items of equipment.

For us, "Protect the things you love" not only means doing everything possible to protect you and your equipment, but also the nature in which we love roaming.

**OUR GOAL IS TO CREATE A COMMUNITY WITHIN WHICH ALL EMPLOYEES, PARTNERS, PRODUCERS, AND CUSTOMERS WANT TO SHARE THIS APPROACH WITH US.**

IN DOING SO, WE DO NOT ONLY FOCUS ON DEVELOPING INNOVATIVE PRODUCTS THAT CONSERVE RESOURCES AS MUCH AS POSSIBLE. WE ALSO TAKE SOCIAL RESPONSIBILITY, PROMOTE PARTNERSHIPS, LIVE AN OPEN AND HONEST COMMUNICATION, AND ARE ALWAYS STRIVING TO FURTHER IMPROVE OUR OVERALL (ECOLOGICAL) IMPACT ON THE WORLD IN OUR DAILY WORK.

# //EVOC RETAIL PROGRAM

Today, retail is facing completely new challenges.

What consumers expect from brick and mortar shops is a great variety of products and immediate availability. An optimal product presentation and pleasant shopping environment help the customer to make a good purchase decision.

Consistent communication and brand message give the buyer a feeling of safety when buying a high quality product.

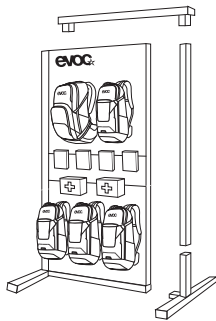

This is why EVOC offers retailers a specific retail program, including sales promotion concepts and measurements. Adding to the program offer are presentation aids, displays, and sales tools.

Please contact your distributor for more information or write to [info@evocsports.com](mailto:info@evocsports.com)

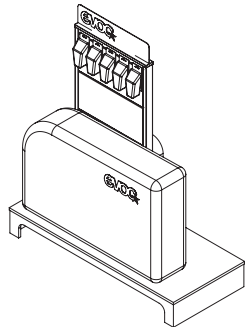

# EVOC PARTNER STORE//

The EVOC Retail Program is offering a wide range of individual solutions for brand communication and product presentation.

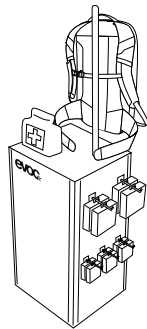

The beautiful display system has been developed in-house and is supporting your shop design and visual merchandising.
